7. Were irregularities found in the DMR data? YES [X] NO []

Comments, including identity of monitoring site:

None submitted.

8. Based on your review, what further actions, if any, do you recommend?

I have sent a copy of the data file to Steve Demczak and James Byars so they know what data is missing and hopefully submit it to the database. The data that is missing in the data file is identified by red highlighted areas of the table where the data should be.

The operator needs to be contacted again to make sure all monitoring is conducted accurately.
